

CONTENTS

摘要	II
ABSTRACT	III
LIST OF TABLES	IV
LIST OF FIGURES	VI
CONTENTS	XV
1.	Intr
roduction	1
1.1	Moti
vation and Literature Review	1
1.2	Obje
ctive and Scope	3
2.	Con
ontrol Algorithm	5
2.1 Sliding Mode Control (SMC)	8
2.1.1 SMC-1 control strategy	11
2.1.2 SMC-2 control strategy	11
2.1.3 SMC-3 control strategy	12
2.1.4 SMC-4 control strategy	13
2.1.5 SMC-5 control strategy	15
2.2 Active Variable Damping Control (AVD)	16
2.3 Static-Output Feedback Control (LQR)	18
2.4 Modulated Homogeneous Friction Control (MHF)	22
2.5 Summary	23
3.	Exp
erimental Hardware Setup	24
3.1 Test Structure	24
3.2 Control Devices	25
3.2.1 Mathematical formulation of MR damper restoring force	26
3.2.2 Performance Test for MR damper	28
3.3 Sensing & Control System	29
3.4 Summary	30

4.		Nu
	merical Simulations & Control Experiments	31
4.1	Sensitivity Analysis on Control Parameters	31
4.2	Numerical Simulation	33
	4.2.1 3-story steel frame with equipment on 1 st floor	33
	4.2.2 Seismic Response control of Bridge-Girder System	43
4.3	Control Experiments	53
	4.3.1 Test Results	53
	4.3.2 Discussion on the Differences between Simulation Data and Test Results	57
5.		Reli
	ability Analysis of the Equipment Isolation System	58
5.1	Reliability Analysis	58
	5.1.1 Probabilistic Seismic Hazard Analysis (PSHA)	58
	5.1.2 Reliability Analysis of Control System	62
5.2	Numerical Example : 3-story steel frame with equipment on 1 st floor	64
6.		Con
	clusions and Future Work	66
6.1	Conclusions	66
6.2	Future Works	68
