Water Supply Facilities Damages by the 1999 Chi-Chi Earthquake and the Aftershock Restoration Works <i>Tsung-Shen Liao</i>	1
Integration of Seismic Modeling Software with Emergency Response Software <i>Xavier Irias and David Wald</i>	4
Recent Topics Related to Seismic Safety of Dams <i>Tatsuo Ohmachi</i>	14
A Sensor Network for Real-Time Damage Location and Assessment <i>Masanobu Shinozuka, Sehwan Kim, Pai H. Chou, Lu Fei and Hong Rok Kim</i>	26
The Project of Reinforcement of Embankment for Measure Against Earthquake of the Murayama-Shimo Reservoir <i>Akira Suzuki and Nobutaka Maruyama</i>	38
Strategy of Shihmen Reservoir High Turbidity <i>Shen-Hsien Chen, Chaur-Gong Jong and Chen-Che Lin</i>	49
Earthquake-resistant Distribution Pipeline Project in Nagoya City <i>Toshichika Matsui</i>	60
Memphis Light, Gas and Water Seismic Planning: The Role of Tanks, Generators, and Distribution System Piping <i>Chandrika Winston, Fred Von Hofe and Quinton Clark</i>	71
Aged-Pipeline Renewal Plan with Enhancing Seismic Upgrade -In Case of Bureau of Public Enterprises, Ibaraki Prefecture- <i>Hayato Nakazono, Kinya Kataishi, Shuzo Furukawa and Minoru Ikei</i>	80
Magic R: Seismic Design of Water Tanks <i>John Eiding</i>	90
Effects of Sloshing of Water in Receiving Water Tank on Water Distribution System during Earthquake <i>Masakatsu Miyajima and Kouichi Murata</i>	101
From Chi-Chi Earthquake to Study about Aseismic Measures and Disaster Crisis Management in Taipei <i>Chin-Tse Cheng and Jiin-Shyang Chen</i>	109
Study for the Safety of Ductile Iron Pipe Earthquake-Resistant Joint in Massive Earthquake <i>Yoshinori Itani and Shogo Kaneko</i>	119
The Italian Contribution to the Analysis of the Effects of Earthquakes on Water Supply Systems: Practical Experiences and Theoretical Investigations <i>Antonio De Risi, Maurizio Giugni, Roberto Guercio and Mario Rosario Mazzola</i>	131

Estimation of Seismic Resistivity and Earthquake-resistant Measures of Water Distribution Facilities in the Hachinohe Regional Water Supply Authority <i>Noboru Murakami</i>	141
Hydraulic Performance Analysis of Water Systems under Major Earthquakes <i>Gee-Yu Liu and Hsiang-Yuan Hung</i>	152
Simulation of Los Angeles Water Supply and Distribution in Response to M7.8 San Andreas Earthquake <i>Craig A. Davis, Natalia Romero and Thomas D. O'Rourke</i>	163
Simulation of the Restoration Process Based on Estimation of Seismic Damage to Distribution Pipes <i>Yuki Sagara, Katsuhiko Eguchi and Ryo Yamashita</i>	174
The Quantitative Risk Analysis of Water Pipe Bridge on Earthquake Disaster - Case Study of Sindian Water Pipe Bridge <i>Ban-Jwu Shih, Siao-Syun Ke, Pei-Chung Hsu and Wei-Chin Chen</i>	186
A Reasonable Approach to the Seismic Assessment of Water Supply Facilities <i>Hayato Yokono and Akinori Sakata</i>	194
Influence of Organizational Structure on Effectiveness of Post-Disaster Management <i>Jiin-Song Tsai and Chieh-Chi Cheng</i>	206
A Regional Water Supplier's Seismic Response Plan as Part of the Organization's Overall Emergency Management Plan <i>Wally M. Lieu, Richard T. Shpall and Winston Chai</i>	219
Introduction of Emergency Water Supply Facilities in Taipei Metropolitan <i>H.H. Ju, K.P. Chang, S.J. Shue, S.L. Teng and S.C. Lin</i>	231
Practical Reinforcement Action of Risk and Crisis Management with Participatory Planning Using a Workshop Method - Emergency Response to Natural Disasters <i>Masao Kadowaki, Nagahisa Hirayama, Daiji Nagashio, and Masakazu Mihara</i>	237
Earthquake Disaster Response Project for Water Facility at Yilan Area <i>Bing-Xin Wang, Zhi-Xian Lin, Jao-Shyan Chen and Yi-Lun Hou</i>	249
Continuous Earthquake Preparedness – Strategic Investment of Resources for Optimal Earthquake Response <i>Walter J. Bishop and Stephen J. Welch</i>	272
Anti-seismic Measures of Water Supply Utility in Great Taipei Area <i>Pei-Chung Hsu, Yu-Chih Chou and Yung-Ming Wang</i>	287
The Present Status, Problems and Promoting Procedures for the Measures Against Earthquake of Water Supply Facilities <i>Munetaka Abe and Yasushi Taguchi</i>	294

A Strong Community Outreach Plan Will Facilitate the Implementation of Complex Seismic Upgrade Programs <i>David L. Pratt and David D. Lee</i>	303
Activities Related to Earthquake-proofing of Drinking-water Infrastructure in the Japan Water Research Center <i>Mikita Amano, Yasuhiro Suzuki and Masahiro Fujiwara</i>	310
San Francisco Public Utilities Commission Water System Improvement Program and Its Seismic Requirements <i>Luke Cheng</i>	322
Evaluation of Effects of Recent Strong Motion Records on Water Supply Facilities <i>Kimiyasu Ohtake, Yasushi Taguchi and Tatsuo Ohmachi</i>	333
Study on the Response of Joint of Large Diameter Pipes Caused by Earthquake <i>Jerry Jwo-Ran Chen and Y Chuan Chou</i>	345
Development of High Seismic Performance Pipe for Crossing Active Faults <i>Nobuhiro Hasegawa, Toshio Imai and Nobuhisa Suzuki</i>	353
Seismic Upgrades of Portland Water Bureau's Water Supply System <i>Keith Walker</i>	364
Replacement of Ductile Iron Pipes Installed in Early Days <i>Kazuhiko Fujimura and Naoki Hosoi</i>	377
Seismic Response of San Pablo Reservoir Drain Intake <i>Ahmed Nisar, David Lee, Nikolay Doumbalski and Eric Fieberling</i>	395
