Table of Contents

Keynote Papers
Advances in Pseudo-Dynamic Testing of Complex Structures Based on Model Reduction Techniques .................................................................................................................. 1
   Oreste Salvatore Bursi, Giuseppe Abbiati, Mohamed Reza and Enrico Cazzador

Implications for Design of Supplementally-Damped Buildings from Full-Scale Lab Tests and Actual Earthquake Observations ................................................................. 22
   Kazuhiko Kasai

Developments on Seismic Retrofit of Reinforced Concrete Shear Walls with FRP ........ 42
   David Lau

Full Scale Test and Analysis on CFT Columns and Connections.................................... 62
   Xilin Lu, Liping Kang, Jianghao Liang and Ge Huang

Use of Shaking Tables in Advanced Hybrid Simulations of Complex Structures .......... 73
   Stephen Mahin and Andreas Schellenberg

Do We Still Need Full-Scale Testing of Complete Structures? ......................................... 74
   Paolo Negro

Advances and Innovations at the Multi-axial Full-scale Substructure Testing and Simulation (MUST-SIM) Facility ................................................................. 86
   Billie Spencer

In-situ Dynamic Tests of Reui-Pu School Buildings in Taiwan .................................... 105
   Yuan-Tao Weng, Tsung-Chih Chiou and Shyh-Jiann Hwang

Novel testing, measuring, and monitoring techniques in structural/geotechnical engineering

Field Dynamic Testing of Civil Infrastructure - Literature Review and a Case Study ........ 123
   Kaoshan Dai, Pierre-Adrien Opinel and Yichao Huang

Dazhi Bridge Safety Monitoring Demonstration Project .................................................. 130
   Zheng-Kuan Lee

Measurement of Residual Stresses in Fabricated Square High Strength Steel Tubes Using Neutron Diffraction Method................................................................. 136
   Fidelis Mashiri, Anna Paradowska, Brian Uy, Zhong Tao and Mahbub Khan

Mixed-Variable Control for Shear Tests on Massive Reinforced-Concrete Walls ........... 143
   Francisco Molina, P. Pegon, P. Caperan, P. Petit and B. Viacco
A Novel Strategy for the Hybrid Simulation of Stiff Structures............................................. 151  
Xenofontas Palios, Elias Streipelias and Stathis Bousias

Dynamic Similitude Law Design of Shaking Table Model Test for High-rise Steel  
Structures................................................................................................................................. 159  
Tiehua Shi and Shaoge Cheng

An Image Analysis Method on Crack Observations of a Cylinder RC Pier ......................... 164  
Yuan-Sen Yang, Chung-Ming Yang, Chang-Wei Huang and Chiun-Lin Wu

Experimental Investigation on CFRC for Strain Measurement and Damage Detection....... 170  
Fang-Yao Yeh, Kuo-Chun Chang, Wan-Yu Lien and W.C. Liao

**Real time structural testing techniques**

Improved Model-based Feedforward and Feedback Control for Real-time Hybrid  
Simulation ............................................................................................................................... 178  
Pei-Ching Chen, Chia-Ming Chang, Billie Spencer and Keh-Chyuan Tsai

Full State Control Via Simulation for Real-time Dynamic Substructuring Test ............... 186  
Zhenyun Tang, Matt Dietz, Zhenbao Li and Colin Taylor

Real-time Hybrid Testing with Constrained Unscented Kalman Filter ............................. 194  
Tao Wang and Bin Wu

Implementation of Nonlinear Control Algorithm for Shaking Table Tests ...................... 202  
Tony T.Y. Yang, Kang Li, JianYuan Lin, Yuanjie Li and YiFan Zhang

**Hybrid simulations**

Analysis and Evaluation of “Smart” Hybrid Simulation with Parameter Adaptation .......... 210  
Cheng Chen, Nelly Avramova, Frank Sanchez and Chris Pong

Application of Frequency-domain Evaluation Method in Real-time Hybrid Simulation..... 218  
Tong Guo, Weijie Xu and Cheng Chen

Substructuring Techniques for Hybrid Simulation of Complex Structural Systems through  
Collapse................................................................................................................................... 225  
M. Javad Hashemi, Maikol Del Carpio Ramos and Gilberto Mosqueda

Model-based Delay Estimation Technique for Real-Time Hybrid Testing ...................... 233  
Zhen Wang, Bin Wu, Oreste Bursi, Guoshan Xu and Yong Ding
Modeling and numerical simulation in predicting and interpreting experimental results

Taiwan Water Supply Network’s Seismic Damage Simulation Applying Negative Pressure Treatment .................................................................................................................. 241
   Kuang-Wu Chou, Gee-Yu Liu, Chin-Hsun Yeh and Chang-Wei Huang

Centrifuge Modeling on Seismic Response of Mono-Pile Foundation in Liquefiable Sand .............................................................................................................................................. 240
   Chung-Jung Lee, Wen-Yi Hung, Yi-Chun Tu, Chen-Hui Tsai, Chin-Cheng Huang, Yuan-Chieh Wu and Meng-Hsiu Hsieh

Railway Bridge-Track Interaction Under Elevated Temperatures ................................................................. 257
   Olivia Mirza, Sakdirat Kaewunruen, Oscar Guzman, Vince Aquino and Anthony Cavasini

A Constitutive Model of Circular Steel Tubes Based on Experiment ............................................................. 265
   Guibo Nie, Jun-Wu Dai, Xu-Dong Zhi and Yong-Giang Yang

Finite Element Modelling of Nonlinear Behaviour of Headed Stud Shear Connectors in Foamed and Lightweight Aggregate Concrete ............................................................................... 273
   Ee Loon Tan, Charles Thomas and Vute Sirivivatnanon

Analytical Models for Seismic Assessment of Reinforced Concrete Bridge Pier ........................................... 281
   Witarto Witarto, Kuang-Yen Liu and Kuo-Chun Chang

Standardization of testing procedures

Trends and Needs for the Development of Refined, Unified Experimental Researches ........................................... 289
   Dun Wang, Xilin Lu and Wensheng Lu

Application of experimental results to structural design and analysis

Ultimate Strength of Composite Beam with Web Openings Subjected to Combined Interaction of Negative Bending and Axial Tension .................................................................................... 297
   Mahesan Bavan, Shahrizan Baharom and Siti Osman

Experimental Strain Fields of Reinforced Concrete Walls for Validation of Numerical Models ......................................................................................................................... 304
   Anna Birely, Dawn Lehman and Laura Lowes
Hybrid Simulation of a Seismically-excited Four-span Curved Bridge ................................. 312
Chia-Ming Chang, Thomas Frankie, Pedro Silva, David Sanders, Daniel Kuchma, and Billie Jr.

Seismic Performance of Base-isolated Structures with Rocking Bearing .............................. 320
Chin-Tung Cheng and Chih-Hong Chao

Study on Relationship between Yield Strength Coefficient & Structure Destructiveness ..... 328
Shaoge Cheng, Tiehua Shi, Caoming Tang and Pei Liu

Low-Damage Earthquake-Resisting Frames Using Steel Sandwiched Buckling-Restrained Braces and Dual-Core Self-Centering Braces ................................................................................. 333
Chung-Che Chou

Performance Verification of a Semi-active Mass Damper by Using Shaking Table Test...... 341
Shih-Yu Chu, Lyan-Ywan Lu, Shih-Wei Yeh and Chih-Hua Peng

Pseudo-dynamic Testing of Self-centering Steel Plate Shear Walls........................................... 364
Patricia Clayton, Daniel Dowden, Chao-Hsien Li, Jeffrey Berman, Michel Bruneau,
Laura Lowes and Keh-Chyuan Tsai

Large-Scale Hybrid Simulation of a Steel Moment Frame Building from the Onset of Damage through Collapse....................................................................................................................... 356
Maikol Del Carpio Ramos, M. Javad Hashemi and Gilberto Mosqueda

Performance Assessment of RC Frames with HCT Brick Infill Walls Rehabilitated with MRM by Using Pseudo Dynamic Test Protocols ................................................................. 347
Pourang Ezzatfar, B. Binici, O. Kurc, Erdem Canbay, Haluk Sukuoglu and G. Ozcebe

Effect of Fillet Radius Size on Ductile Fracture of Steel Beam-to-Column Connection with Large Weld Defects .............................................................................................................. 372
Hanbin Ge, Lan KANG and Shinki HADA

Experimental Testing of Lightly Reinforced RC and Self-centering PT Walls....................... 380
Richard Henry, Kimberley Twigden and Yiqiu Lu

Field Test for School Building Retrofitted by External Steel-Framing System ...................... 388
Fu-Pei Hsiao, Chien-Tai Shih, Shih-Yu Chu, Yu-Wen Liou, Chih-Chi Huang,
Tsung-Chih Chiou and Yi-Che Chiu
Experimental Study on Reinforced Concrete Moment-resisting Frames with Infilled Masonry Walls Subjected to Cyclic Loads
Huanjun Jiang, Junjie Mao and Xiaojuan Liu

Seismic Behavior of a Full-Scale Special Concentrically Braced Frame: Hybrid Simulation under Design Earthquake and Maximum Considered Earthquake
Jiun-Wei Lai and Stephen Mahin

Earthquake Simulation Tests on a 1:15 Scale 25-Story RC Flat-Plate Core-Wall Building Model
Han Seon Lee, Sung Hyun Choi, Kyung-Ran Hwang, Yoon-Ho Kim and Sang-Ho Lee

Earthquake Simulation Tests on a 1:5 Scale 9-Story Piloti-Type RC Residential Building Model
Han Seon Lee, Chang-Bum Kang, Gi-Hyun Jeong, Sang-Ho Lee and Sang-Hoon Oh

Cyclic Tests of Three Full-scale Two-story Steel Plate Shear Walls Using Box Columns with or without Infill Concrete
Chao-Hsien Li, Keh-Chyuan Tsai, Hsuan-Yu Huang and Chih-Han Lin

The Establishment of Dynamic P-Y Curve in Pile Foundation Based on Shaking Table Tests
Peizhen Li, Shenglu Cao, Daming Zeng and Xilin Lu

Seismic Retrofit of Full-scale Rectangular RC Columns Subjected to Incremental Axial Force
Min-Lang Lin, Yin-Han Wu and Pei-Ching Chen

Seismic Responses of Buckling-Restrained Brace to Gusset Connections in Framed Structures
Pao-Chun Lin, Keh-Chyuan Tsai, Ming-Chieh Chuang and An-Chien Wu

Seismic Testing and Grading of Ductile Iron Water Pipes
Gee-Yu Liu, Lap-Loi Chung, Pao-Ching Chou and Chin-Tse Cheng

Experimental Study on Seismic Performance of a Controllable Rocking Reinforced Concrete Frame
Liang Lu, Xilin Lu, F.B. Zhu and Junjie Chen

Dynamic Testing of a Mixed RC-URM Building
Simone Peloso, Katrin Beyer, Alberto Pavese and Marco Tondelli
Evaluation of the Seismic Performance of Two-Story Concentrically Braced Frames with Weak Beams ................................................................. 484
Andrew Sen, Dan Sloat, Lingli Pan, Charles Roeder, Dawn Lehman and Jeffrey Berman

Survey and Testing of Pre-1988 Braced Frame Structures from the West Coast of the United States ........................................................................... 492
Dan Sloat, Charles Roeder, Dawn Lehman and Jeffrey Berman

Study on Dynamic Behavior of Bridge Pile in Dry and Saturated Sand through Shaking Multi-layer Shear Box Test ............................................................................. 500
Yu-Chi Sung, Kuo-Chun Chang, Cheng-Hsing Chen, Tzou-Shin Ueng, Chia-Han Chen, Shiue-Yi Dung, Kuang-Yen Liu and Yi-Tsung Chiu

High-mode Buckling of Buckling-restrained Brace Core Plates ........................................ 509
An-Chien Wu, Pao-Chun Lin and Keh-Chyuan Tsai

Experimental Study on Shear Behavior of High Strength Concrete and HRBF 500 Steel Beams without Web Reinforcement ................................................................. 517
Xiang Guo Ye, Tian Qi Lei, Xun Chong and Jun Qi Huang

An Experimental Study on Seismic Isolation Using a Leverage-type Stiffness Controllable System .................................................................................................................. 524
Chin-Hsun Yeh, Lyan-Ywan Lu and Shih-Yu Chu

Experimental Study on Large-Scale Joints of Ring Beams and RC-CFSTL Columns for Tall Buildings ............................................................................................................. 532
Haiyan Yu, Ying Zhou, Ge Qu, Lu Zhang, Yi Chen and Kai Hu

Mechanical Behaviors of Precast Concrete Sandwich Pannels after Exposure to Fire ........ 540
Li Zhi Jie and Xue Weichen

Data management and information systems for structural experimentation

Preliminary Framework for Reporting Damage in Reinforced Concrete Structures to Enhance Data Archival and Reuse ........................................................................ 547
Anna Birely

A Semantic Technology-Based Information Management System for Earthquake Engineering Projects and Experiments ......................................................... 555
Md. Rashedul Hasan, Feroz Farazi, Oreste Bursi and Md Reza
Design, construction, and utilization of novel testing facilities

Design, Implementation and Validation of a Real-Time Dynamic Hybrid Testing System Mainly Oriented to Seismic Isolated Structures
Igor Lanese and Alberto Pavese

Software and hardware development for structural experiments

A Software Framework for Quasi-static Structural Testing
Kung-Juin Wang and Keh-Chyuan Tsai
