ABSTRACT 2
摘要 3
誌謝 4
Contents 5
Chapter 1 Introduction 8
1.1 Background and motivation 8
1.2 Literature review 10
1.3 Organization and objectives of the dissertation 12
Chapter 2 Essence of Phase for Tuned Mass Damper 14
2.1 Modeling of SDOF structure implemented with TMD 14
2.1.1 Equation of motion 14
2.1.2 State-Space representation 16
2.1.3 Transfer function and frequency responses function 17
2.2 Power flow theory 18
2.3 Power reactance 21
2.4 TMD stroke 23
2.5 Numerical Simulations 24
2.5.1 Frequency response function 25
2.5.2 Free vibration simulations 28
2.6 Discussion 36
Chapter 3 SDOF Structure Implemented with PC-TMD for Wind Loads Application 37
3.1 Equations of motion for a SDOF structure with a phase control tuned mass damper under wind loads 38
3.2 Real time phase observation and phase control strategies 40
3.3 Sign judgment criteria for friction force applications 45
3.4 The on-off friction force calculation 48
3.5 Phase Control Algorithm 49
3.6 Numerical Verification of a SDOF structure implemented with a PC-TMD 51
3.6.1 Sinusoidal loads 52
3.6.1.1 External load with a frequency of 1.0 times the natural frequency of the structure 52
3.6.1.2 External load with a frequency of 0.95 times the natural frequency of the structure 55
3.6.1.3 External load with a frequency of 1.05 times the natural frequency of the structure 59
3.6.2 Frequency Response Function 63

3.6.2.1 Optimal design parameters of TMD and PC-TMD 63
3.6.2.2 Off-tuned effect of TMD and PC-TMD 65
3.6.2.3 Comparison of maximum friction force of PC-TMD 68
3.6.3 Free Vibration 70
3.6.4 Design Wind Loads 73
3.6.4.1 Sensitivity analysis of the TMD frequency ratio under design wind force 77
3.6.4.2 Sensitivity analysis of the TMD damping ratio under design wind force 79
3.6.4.3 Sensitivity analysis of the maximum friction force of PC-TMD under design wind force 80
3.7 Conclusions of SDOF structure implemented with the PC-TMD for wind loads applications 82
Chapter 4 MDOF Structure Implemented with PC-TMD for Wind Loads Application 84
4.1 A 3-DOF structure implemented with two PC-TMDs 84
4.1.1 Modeling of a 3-DOF structure implemented with two PC-TMDs 84
4.1.2 Phase control algorithm for 3-DOF structure 90
4.1.3 The on-off friction force calculation 91
4.1.4 Numerical Simulations 94
4.1.4.1 Frequency Response Functions 96
4.1.4.2 Design Wind Loads Time History Analysis 99
4.1.5 Conclusions of A 3-DOF structure implemented with two PC-TMDs 107
4.2 A 42-story building implemented with a PC-TMD 108
4.2.1 Modeling of a 42-DOF structure implemented with a PC-TMD 108
4.2.2 Parameters of Primary Structure and TMDs 112
4.2.3 Phase control algorithm for MDOF structure 113
4.2.4 Real-time filter application for phase control algorithm 113
4.2.5 Numerical Simulation 116
4.2.6 Conclusions of A 42-DOF structure implemented with the PC-TMD 121
Chapter 5 SDOF Structure Implemented with PC-TMD for Base Excitation Application 122
5.1 Equations of motion for a SDOF structure with a phase control tuned mass damper under base excitation 122
5.2 Phase control algorithm for base excitation 124
5.3 The on-off friction force calculation 124
5.4 Numerical Verification of a SDOF structure implemented with a PC-TMD 125
5.4.1 Frequency Response Function 127
5.4.1.1 Without de-tuning effect for TMD and PC-TMD 127
5.4.1.2 Off-tuned effect of TMD and PC-TMD 129
5.4.2 Design Earthquakes 133

5.4.2.1 Sensitivity analysis of the TMD frequency ratio under the in-site earthquake 137
5.4.2.2 Sensitivity analysis of the TMD damping ratio under the in-site earthquake 139
5.4.2.3 Sensitivity analysis of the maximum friction force of PC-TMD under the in-site earthquake 140
5.4.2.4 Sensitivity analysis of the earthquakes..... 142
5.5 Conclusions of SDOF structure implemented with the PC-TMD for base excitation applications..... 145
Chapter 6 Conclusions and Future Works..... 147
6.1 Summaries and Conclusions 147
6.2 Recommendations for future works 149
Reference 150
Appendix A. Frequency Response Function of A 2DOF System 155
Appendix B. Instantaneous Phase Calculation by Hilbert Transform..... 157
Appendix C. Preliminary Design of Maximum Friction Force for the PC-TMD..... 159
