Analysis Contest on a 7-story Reinforced Concrete Building under Near-fault Earthquakes Results of the Contest

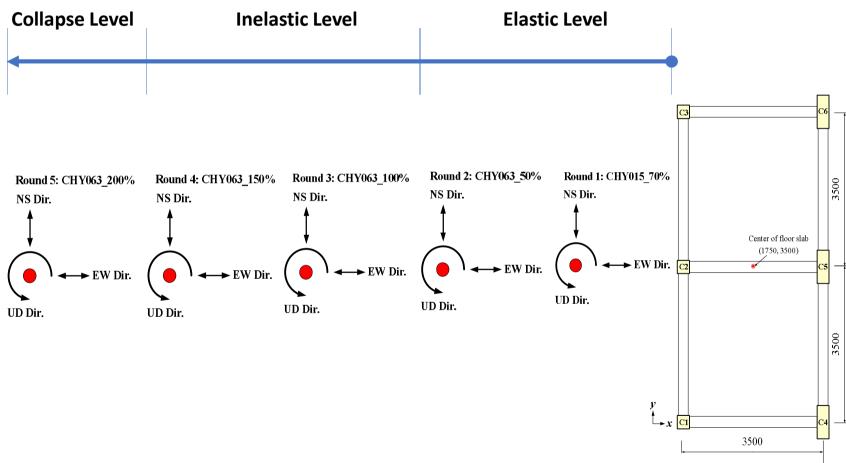

National Center for Research on Earthquake Engineering

Ground motions

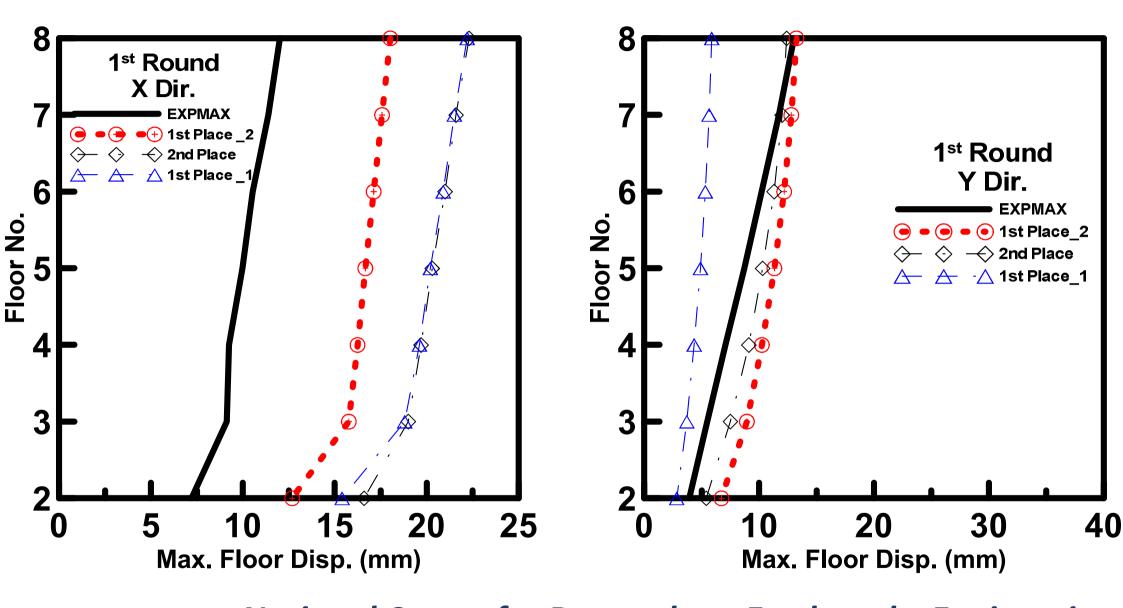

- Elastic Level: far-field ground motion, near fault ground motion
- Inelastic Level: near fault ground motions
- Near Collapse Level: near fault ground motions
- 'Run 1_CHY015_70%': Far field ground motion CHY015 scaled to 70%
- 'Run 2_CHY063_50%': Near field ground motion CHY063 scaled to 50%
- 'Run 3_CHY063_100%': Near field ground motion CHY063 in full scale
- 'Run 4_CHY063_150%': Near field ground motion CHY063 scaled to 150%
- 'Run 5_CHY063_200%': Near field ground motion CHY063 scaled to 200%

National Center for Research on Earthquake Engineering ~ Winners! ~

1st Place:

Yasunori Mizushima, Takuya Kinoshita, Yuki Idosako and Hiroto Takatsu Research and Development Institute, Takenaka Corporation, Chiba, Japan

1st Place:

Riku Sakamoto*, Zhang Kaiwei*, Li-Wei Yu**, Kuang-Yen Liu**

- *Kozo Keikaku Engineering, Tokyo, Japan
- **National Cheng Kung University, Tainan, Taiwan

2nd Place:

Xinlei Jin and Chi Zhang (金鑫磊和张弛)

Department of Civil Engineering, Tsinghua University, Beijing, China.

Awards

Awards will be given in a special ceremony at the International Conference on Earthquake Engineering in Commemoration of the 20th Anniversary of the 1999 Chi-Chi Earthquake. A representative of each winning team will be invited to this conference that will be held in Taipei, September 15-19, 2019. NCREE will cover the registration fee and accommodation expenses for the winners' participation in the conference. The representative will be asked to make a short presentation on the techniques used (model and analysis) in making the winning predictions. The awards for the 1st – and 2nd –place teams are US\$2,000 and US\$1,500, respectively.
